

Vision, Mission, and Core Values

Our Vision

To be an educational institution with a recognized and exemplary institutional identity that can cultivate individuals who are successful, competent, effective, and capable of using initiative in accordance with universal principles of education, anywhere and everywhere, who have embraced democracy, who are pioneering in social and cultural activities, and who are recognized and emulated within Istanbul and Turkey.

Our Mission

We exist to enable our students to learn, taking into account their personal qualities, to enhance their success, and to equip them with the academic qualifications necessary to enter the best universities in Turkey and realize their potential. We aim to cultivate individuals who embody national and spiritual values, who have high self-confidence, who can look at events from various perspectives and impartially, who have acquired skills to meet the evolving needs of their time, who embrace behaviors conducive to good and positive communication with their surroundings.

Our Core Values

In accordance with the objectives of the Turkish national education, we embrace the national and moral values of our nation. We prioritize love for humanity, honesty, diligence, and environmental awareness.

We value the "We" approach over the "I" approach. We prioritize student-centered education in carrying out educational activities.

We believe that correct and effective communication enhances success in education, prioritize our students' ability to learn how to learn, and emphasize the importance of learning by doing.

We consider the discovery of our students' talents, their self-recognition as individuals, and their awareness of their responsibilities to society as fundamental educational principles, as demonstrated by the care we show in social activities.
